Consolidated Solution/Correction Plan for above IP address:

In httpd.conf, set the 'UserDir' to 'disabled'.

Filter out the ICMP timestamp requests (13), and the outgoing ICMP timestamp replies (14).

Part 3b. Special notes by IP Address

IP Address	Note	Item Noted (remote access software, POS software, etc.)	Scan customer's declaration that software is implemented securely (see next column if not implemented securely)	Scan customer's description of actions taken to either: 1)remove the software or 2) implement security controls to secure the software
